

UPDATE 83

14 April 2025

New RGGO Spot Contract

AFMA's Environmental Products Committee has approved a new template Spot Contract for certificates created under GreenPower's Renewable Gas Guarantee of Origin (RGGO) Scheme.

The RGGO Scheme is intended to enable a voluntary market for renewable gases and provides independently certified renewable gas options for commercial and industrial gas users.

The AFMA RGGO Spot Contract is based on the existing AFMA Environmental Products Spot Contract but also includes additional representations and warranties to support the voluntary nature of RGGOs.

The AFMA RGGO Spot Contract is available in section 3.9 of the OTC Guide.
